

Certificate in Computer Numerical Control (CNC) Machinist Level 2

Program Overview

The Computer Numerical Control (CNC) Machinist Level 2 Certification program is designed to meet journey-level requirements for on-the-job skills. The Computer Numerical Control (CNC) Machining certificate will help you become a CNC operator/programmer. This certificate is for you if you want to be able to program and operate CNC machines, upgrade your present skills, or if you are preparing yourself for new CNC processes coming into your workplace.
