

OSHA: Annual Training

Duration: 8 hours

Audience: All shop employees

OSHA requires 8 hours of additional annual training for every shop employee. This training class can be conducted on a variety of topics based on the characteristics of your environment and the topics you have previously covered.

Below is a list of some common automotive repair shop topics. If you do not see a topic that applies to your facility, we can research and source the appropriate trainer to provide you total control over the content.

Automotive Repair Shop Topics:

- 1910 Subpart H, Hazardous materials
- 1910.106, Flammable and combustible liquids
- 1910.107, Spray finishing using flammable and combustible materials
- 1910 Subpart I, Personal protective equipment
- 1910.132, General requirements (Personal protective equipment)
- 1910.134, Respiratory protection
- 1910 Subpart J, General environmental controls
- 1910.147, The control of hazardous energy (lockout/tagout)
- 1910 Subpart L, Fire protection
- 1910.157, Portable fire extinguishers
- 1910 Subpart O, Machinery and machine guarding
- 1910.215, Abrasive wheel machinery
- 1910 Subpart S, Electrical
